

MulchMax 101wood

Spray-application hydromulch is an ideal way to control soil erosion under a variety of conditions. The natural re-vegetation of a site uses the root structure of the plants to help lock soil in place to combat the wind and water that threaten to wash it away. Vegetation also has an inherent aesthetic appeal that all site visitors can appreciate, and is a benefit to the local ecosystem. Hydromulch supports germination by providing vegetative cover that holds water in the soil, and the soil in place. MulchMax 101wood provides an adaptable, cost-effective hydromulch medium.

Advantages of MulchMax 101wood

- Made from organic, naturally-occurring material
- 100% biodegradable
- Engineered to contour to soil and is suitable to apply on a variety of slopes
- Fast to load in easy-to-handle bales
- Mixes easily with water
- Flows smoothly to provide uniform application
- A resilient medium for rapid vegetation establishment
- Only requires 90 gallons (341 litres) of water for every 50lb (23 kg) bag of mulch

Suitable applications

- Can be applied on up-to 4:1 slopes
- Supports hydroseeding
- Suitable for highway projects, golf courses, mine reclamation sites, residential & commercial landscaping and anywhere rapid vegetation is required

MulchMax 101wood

The MulchMax difference

MulchMax 101wood is a virgin wood fiber mulch with the added benefit of flexible bast fibers. Bast is one of the strongest natural fibers in the world, and is a perfect fit for the MulchMax philosophy: To provide mulches that tightly contour to the soil and maximize soil-to-seed contact.

Bast fibers

MulchMax 101wood also offers:

- **Water conservation** – Easy-blend qualities mean up to 40% less water for mixing and application.
- **Job-site efficiencies** – Less water for mixing means fewer trips to refill spray tanks, trips that take crews away from the task-at-hand.
- **The benefits of research** – The range of MulchMax products available means that wood blend customers are getting more than a “basic hydromulch,” they’re getting a formula with years of research behind it.

The Nilex Advantage

Nilex is committed to unearthing better results. Whether it’s for a civil, resource or environmental project, we offer the latest engineered and technically superior materials and techniques to save our customers time and money, and minimize the need to move or remove earth, and reduce the need for granular materials.

With over 30 years experience, a long-standing commitment to the environment and highly qualified staff, Nilex delivers the products and technologies that give clients an economic advantage with environmental benefit.
